Complaint 13:30 Contacted: Mike Canfield 16:00

Drain plugged - dumping waste oil into storm drain - see picture

Mr. Canfield was evidently not at station at time of violation and was unaware.

He and his employees were informed that such action was in violation of water quality standards and City Ordinances.. Mr. Canfield instructed h s employees not to repeat the infraction.

Complaint first answered R. Lyman, J. Higgins at 16:00 above were joined by H. Criswell & B. Corson

April 11, 1972.

Lyman, Corson, Higgins

John Shanholtzer, plumbing inspector, informed our department of an apparent oil spill in the east ditch of Ingram Mill Road just south of Sunshine. An investigation was made and oil does exist in the ditch.

Bryant & Blount Oil Co., 3351 E. Sunshine ph. 883-1611, was contacted and asked if they had seen the oil and they said they had seen the oil and that it was coming from a building owned by them but leased to Kraft Foods.

Mr. Redman was contacted at Kraft Foods ph. 881-2701 and four men met us at this location at 3351 E. Sunshine to look at the problem. Kraft officials said that they used no oil at this place and that it is used for service and storage of bulk tanks for milk barns.

The floor drains were dyed and it was found that they entered the storm sewer. This building is apparently not contributing to the oil spillage problem.

Dear Skene

Enclosed is a copy of a letter from Bryant and Blount reference their gasoline spill.

It seems they have left it up in the air as to definite action.

Could me a call when you have time and we'll discuss it.

Respectfully
Ernest A. Ball P.E.

Springfield, Missouri 65801

Dear Mr. Balk:

Thank you for your certified letter dated May 19, 1972.

This is for the purpose of letting you know in writing of our action as a result of our spill of approximately fourteen (14) gallons of gasoline onto a blacktop surface and being flushed by water 240 feet to a storm sewer at the corner of Ingram Mill Road and Sunshine Street.

As the water flowed over the blacktop drive it picked up a black oil substance. At the end of this run-off, lays a hole that holds approximately 712 gallons of water or anything else that may run into it. This amount was pumped out by this firm in order to clean up the spill. To my surprise, was the amount of infected water remaining there for harmful insects and etc.

I believe I have measured up to my obligation by cleaning up the debris. However, I wonder how much of this debris was mine, as I remember about three weeks prior you noticed a waste substance to the east of this firm.

As you may know spillage is a very costly item to this company. I can assure you this resulted as a loss to me, and a untidy appearance on our property which seldom happens.

Yesterday, I visted many plants here in Springfield. It seems no one has an answer to this sitution. We are in a study of such a plan. As soon as I can find some formula -- I will immediately notify you for your study. This is new to us as to how to full proof a way to prevent no possible spillage.

3351 E. Sunshine

Since 1956 we have won nine (9) awards from Texaco for the most "Well Kept Bulk Plant" in the State of Missouri. We have also been told by our insurance company that we hold the same respect from them. This makes me real proud of our plant and personnel.

This is only to tell you we want to be a good housekeeper in the future, as we have been in the past, regardless of the law.

If you have any future questions regarding this matter please contact me at your earliest convenience.

Very truly yours,

BRYANT & BLOUNT OIL COMPANY
